

Trail upgrading in Labrador Nature Park

NParks is enhancing Labrador Nature Park for a better visitors' experience.

Why is this area closed?

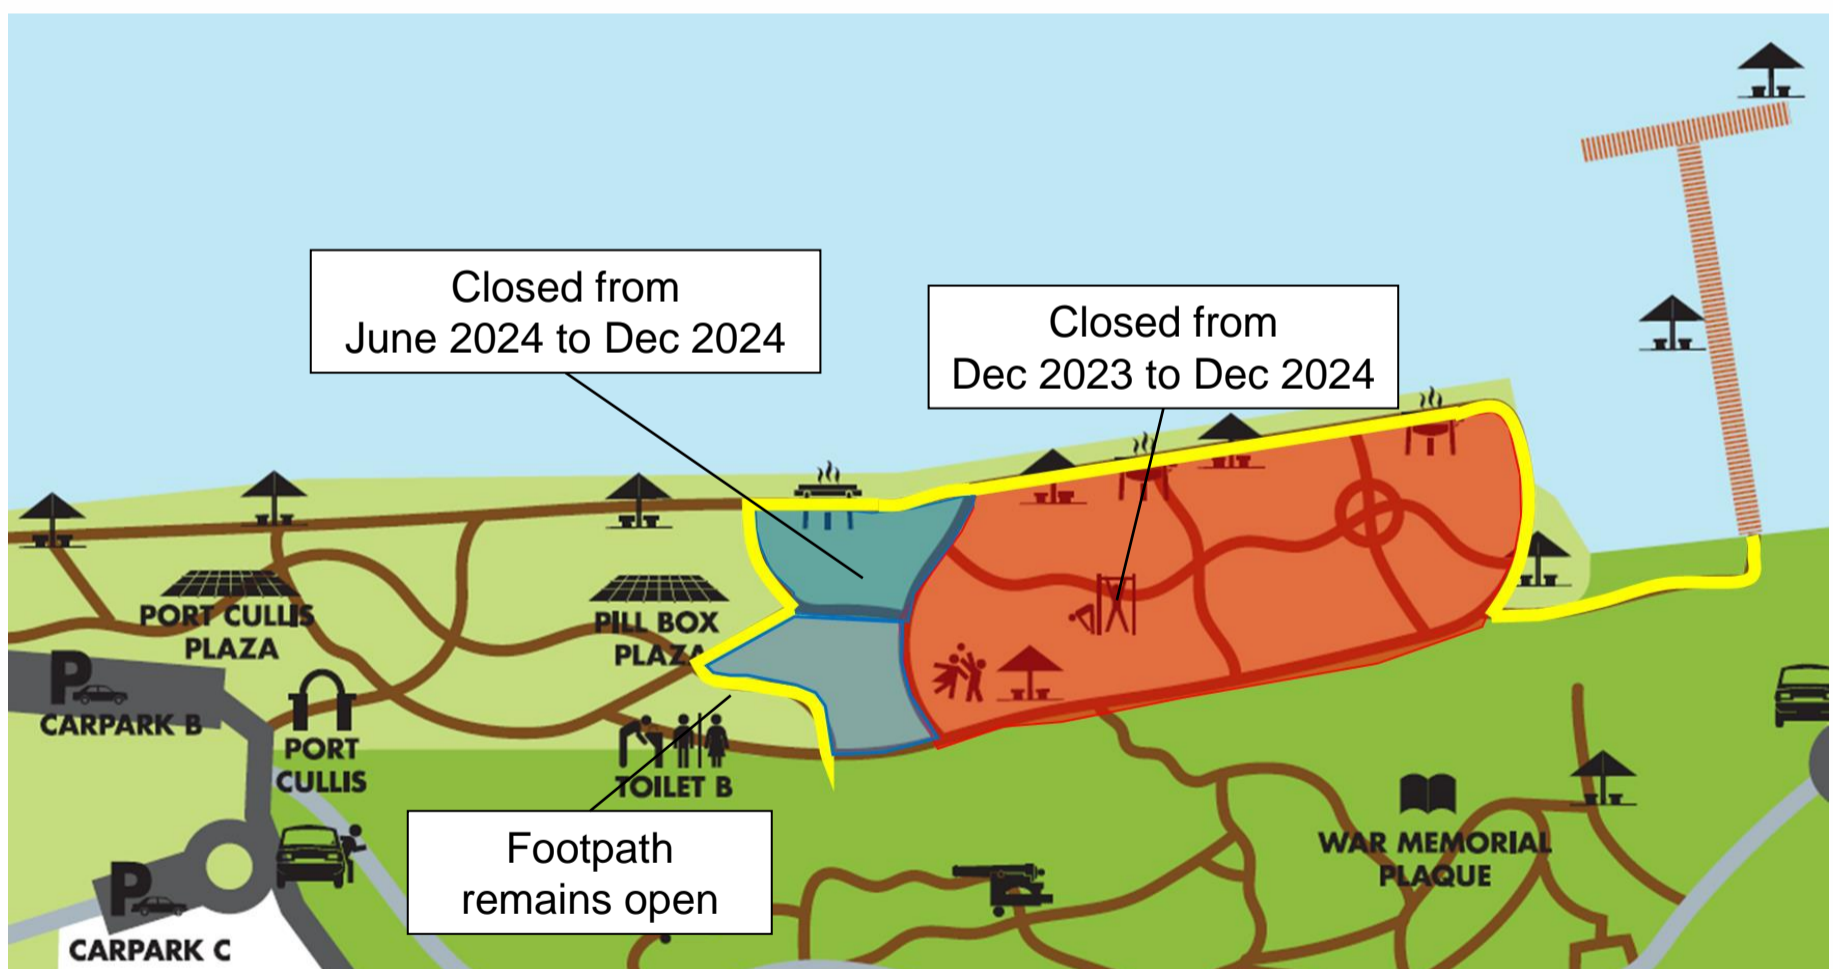

As part of the Forest Restoration Action Plan for Labrador Nature Reserve, we are restoring a 2.5 ha coastal beach forest area.

To do this, certain sections in the nature park (see map below) will be closed in two phases. An existing trail within these sections is also being enhanced.

Enjoying the Nature Park

When the trail is ready in 2025, visitors can enjoy a rustic experience as they learn more about the coastal forest habitat.

In the meantime, the rest of the nature park remains open for visitors to enjoy. Please use the footpath (indicated in yellow below) to get around during this period.
